Prince George, BC V2L 3B8

**Attention: Steven Findlay
President**

Dear Steven:

RE: WORKING WITH NORATEK SOLUTIONS INC.

Volker Stevin Contracting has grown to become one of the largest General Contractors in Calgary, Alberta specializing in Utility Installation, Road Construction, Structural Construction, Project Management as well as Highway Maintenance for provincial and municipal clients. Our staff work all over Calgary as well as on the highway networks west of Calgary to Banff National Park stretching down to Waterton National Park, east to the Saskatchewan border and south to the United States border. We employ more than 500 people out of 40 different facilities all over southern Alberta so you can imagine the headaches involved in getting every employee paid on time.

The Highway Maintenance Division had worked with Noratek previously on our AMA Road Condition mobile reporting process and we felt you had a good understanding of our unique types of work and how we operate so it made sense to look to Noratek to help us move from paper timesheets to mobile timesheet data collection.

Our Project Reporter Application now uses laptop and desktop computers and will incorporate the Blackberry for small crews in the near future. Foremen have an easy-to-use timesheet entry system with access to current employee, job number and equipment data. Previously Foreman had to take their daily timesheets to a fax machine or into the main Calgary office each day, now they complete the timesheets during the day from their mobile sites and sync them easily with the server saving all that driving time. Data entry time has been cut so that our payroll department now has more time to check and process payroll data. Reports using all this collected data are now quickly and easily accessed by all who require the information.

Throughout this project I have dealt with 4 different IT companies and can say with great enthusiasm that Noratek has been by far the most responsive, as well as the most fun to work with of them all!

With sincere thanks,

VOLKER STEVIN CONTRACTING LTD.
